

# green SIDE UP

**OFFICIAL NEWSLETTER OF COASTAL GREENERY LANDSCAPING**

Serving Beaufort, Bryan, Bulloch, Camden, Chatham, Effingham, Glynn, Jasper, Liberty, McIntosh, Nassau, & Wayne Counties

## Water Management and Conservation Program

**Coastal Greenery's water management and conservation program includes upgrading clients' irrigation systems to new, state-of-the-art equipment and 24/7 remote monitoring.** This program saves as much as 38% on our clients' current landscape irrigation use and includes participation in a global water initiative to give back a lifetime supply of water for one person to thirsty communities for every updated irrigation controller our clients install. Current estimates indicate that clients currently taking part in the program are helping to provide millions of gallons of water to needy communities around the world.

The program is a collaborative effort between Coastal Greenery and Weathermatic, which provides advanced smart water and site management technology. With this program, Coastal Greenery provides 24/7 water management services and installs the SmartLink system of irrigation controllers, sensors and monitoring software to improve watering efficiency, detect leaks and automatically adjust irrigation settings according to hyper-local weather conditions and specific plant needs. Changes can be made instantly, and the system can shut down a zone remotely if a leak is detected, saving countless gallons of water waste and protecting property infrastructure.

## Properties of the Month: APRIL

Country Walk  
Golden Isles

Heartwood  
Savannah

Joint Water/Sewer Comm.  
Support Services

Allison Memorial  
South

Each Property of the Month is selected by the Branch Manager according to the crew's monthly Quality Control report.

*"We are excited to be taking proactive steps to be more sustainability-minded in our approach to water use,"* said Jeffrey Johns, President/CEO of Coastal Greenery. *"Even more exciting is the opportunity to provide water to underserved communities. Through the #SaveWaterGiveLife program, we'll be able to support drilling new water wells around the world - effectively redirecting the millions of gallons of water we'll save, to those who need it most."*

Coastal Greenery is a commercial landscape management company serving commercial properties who demand the best in quality and service. Coastal Greenery is a Weathermatic Premier Partner, and as such are fully trained and up-to-date on the latest technological advances in water and site management. These innovative systems not only help provide better client service and resource savings but also save time and fuel via remote access – providing green solutions by eliminating multiple on-site trips each season to adjust controllers.

**Weathermatic has been the world's leader in irrigation controllers for over 75 years and has helped save literally billions of gallons of water through the use of their ground-breaking smart water and site management technology.** They have also helped provide water to thirsty communities throughout the world through development of the #SaveWaterGiveLife global water initiative. To learn more about Coastal Greenery's Water Management Program, contact your Client Relations Leader or contact the office @ 912-261-8171.

## Team Members of the Month: APRIL

**Trevor Callaway**  
Golden Isles

**Genaro Valdez**  
Support Services

**Margarito Marquez**  
Savannah

**Jaylin Evans**  
South

These team members display our core values (**Responsive, Ownership, Observant, Trusted, Skillful**) in all that they do while working, have excellent attendance, and are constantly trying to improve themselves.

## How Do We Do It?

State-of-the-art equipment, 24/7 monitoring and weather-based programming creates healthier, more beautiful landscapes with controllers that adjust daily for precise plant needs and protect site assets.

**SAVE WATER:** Our systems save an average of 38% and are EPA WaterSense Certified.

**SAVE MONEY:** Protect plants and structures from damage resulting from over/under watering, reduce liability and avoid fines from watering violations.

**PROTECT PEOPLE:** Avoid liability hazards like icy or wet walkways, roads and other structural damage.

**SYSTEM VISIBILITY & ANALYSIS:** Asset mapping, verified inspections & repairs & detailed reports.

**24/7 REMOTE ACCESS & ALERT MONITORING:** Instant notification of issues like stuck valve & breaks.

**SOCIAL RESPONSIBILITY:** Conserve water, give back and contribute to global sustainability.

**WHAT DOES IT COST?** As a Weathermatic Premier Partner, we can now offer the equipment upgrades and enhanced service as part of our regular service contract. You will be cash flow positive as early as day one!

## SmartLine Controller and Weather Station

Controller makes daily water adjustments based on:

- high/low temperature • humidity • plant type
- soil type • sprinkler type • slope

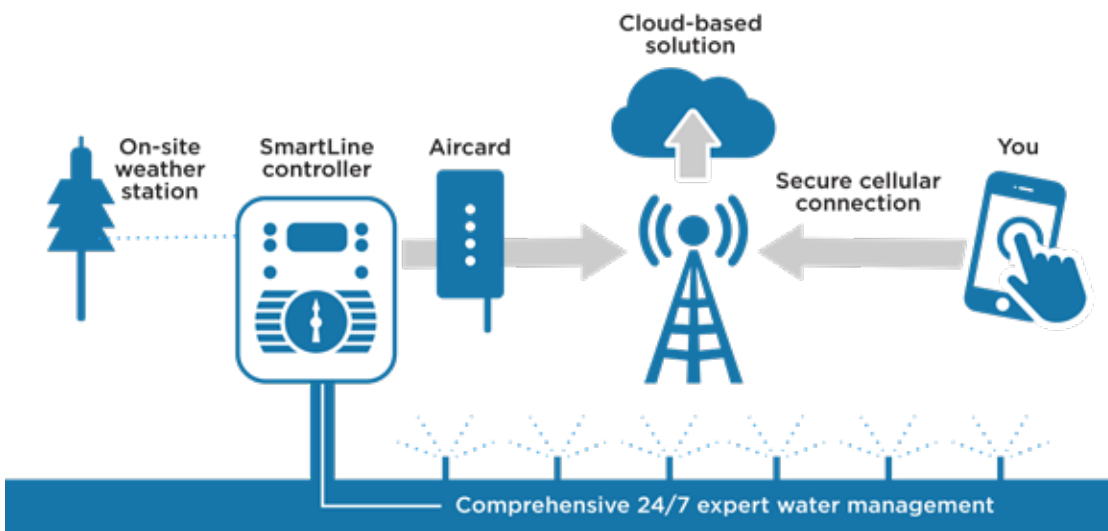

Weather station set at each controller and communicates wirelessly

Meets EPA Water Sense Criteria

## SmartLink Software

- Uses cellular communication & Amazon Cloud
- Programming changes can be made remotely from any web-enabled device
- In-depth reports of run times and weather data
- Asset tagging and zone mapping
- Web based inspection reports with photo documentation
- Daily alert reporting

## Our partnership with Weathermatic provides more beauty, savings & service for all.

All our clients will enjoy beautiful landscapes, reduced water costs, fewer expenses, greater service transparency, and better equipment & system performance.

Our community will benefit from resource conservation, community beautification and participation in our global water initiative *#SaveWaterGiveLife*.

## Your Licensed Professionals Deliver Value.

As in any profession, it's important that we know our job. With hundreds of plant varieties, insects and diseases, professional knowledge means **more professional results**. You may not realize that most professional lawn technicians and applicators must meet special training and testing requirements from the EPA and state in order to be licensed or certified to work with your lawn or landscape. Then, for certification to be maintained, on-going education and training must continue every year.

Before we work on your lawn, you can be sure we not only know what we're doing, but how to do it best.

This means better results and fewer problems for you when you employ only carefully trained and certified professionals to work on your lawn and landscape.

**Count on us for care that's our professional best... for you and for the earth we all share!**

*Our team appreciates your feedback and support!*
